# FINANCIAL SERVICE PROVIDERS' SOCIAL AND FINANCIAL DATA

Make the Difference  
We Prove It

With the support of

With the participation of

# Validated data on Financial Service Providers' (FSP) pricing, client protection, social and financial performance

## Benefits for FSPs providing data

### Benchmark overview

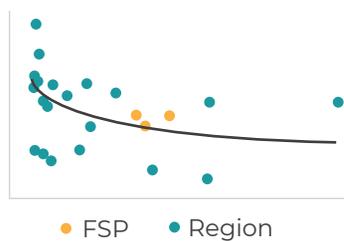

FSPs receive a **benchmark overview**, to compare their key indicators with the benchmark on ATLAS (global or regional average depending on nominative vs anonymous provision of data). The benchmark overview provides an initial indication of where the FSP stands compared to other FSPs. More detailed data than the benchmark overview is available to FSPs through a subscription (<https://data.atlasdata.org/vue/data-subscription>).

### Portfolio quality

### APR

### FSP

### Region

● % male borrowers  
● % female borrowers

### Price Disclosure Award

FSPs who report the Annual Percentage Rate (APR) can request the **Price Disclosure Award** for free, recognizing their fully transparent APR disclosure (gold or silver depending on nominative vs anonymous provision of data).

### International visibility

FSPs providing nominative data increase their **international visibility** with the subscribing investors, who will see their names on the website.

### Quality

The data are validated by a third party or self-reported and checked for consistency.

### Providers

Rating agencies  
CERISE  
Smart Campaign  
Investors  
Networks  
FSPs

Reputation risk  
Transparency

### Subscribers

Investors  
Networks  
Standard setters  
Researchers  
Regulators

### Confidentiality

Data are shared nominatively or anonymously with subscribers. Data are not publicly available.
